- **Mr. Premnath Kini(4CB23CB043)**

VISION

To be recognized as a centre of excellence in Computer Science and Business System producing a pool of engineers through advanced knowledge and innovation in analysis, computation and solution of real time problems of mankind.

MISSION

- To provide a learning environment endowed with competence and expertise in Computer Science and Business System education.
- To promote a culture of entrepreneurship and innovation among students by disseminating knowledge and best practices in the domain.
- To create opportunities for all-round development students through co-curricular activities and extra-curricular activities and foster lifelong learning.
- To impart value-based learning among students enriched with ethics to address the needs of society and industry.

DEPARTMENT PROFILE

The department was started in the year 2021 to offer under graduate degree programme i.e. Bachelor of Engineering (BE) in Computer Science & Business System (CSBS). The department has qualified, experienced and zealous faculty members to guide the students in academics and career. The faculty members are actively involved in teaching, product development and research. The department aims at building the student's career by placing special emphasis on all-round development through continuous interaction with Industry. The campus placement has been scaling higher and higher peaks right from its inception with multinational companies recruiting students in large numbers. The department aspires to promote start-up ideas and entrepreneurship among students to cater the needs of society. Bachelor of Engineering in Computer Science & Business System programme

aims to impart cutting-edge technologies and business skills among students to become competent industry ready IT professionals, researchers and entrepreneurs. This program provides hands on exposure to emerging technologies in data analytics and computation, software development, marketing research, operation management etc. The programmer's goal is to provide skill learning to solve problems in aspects of science, technology, business and society.

To increase the opportunity of placements to students, the department conducts soft skills training programs, technical skill development activities and initiatives on self-learning (Spoken Tutorial programs by IIT Bombay). The students' association and National Service Scheme (NSS) wing frequently conducts various programs to strengthen leadership skills, teamwork and communication; and awareness on protection of environment and social responsibilities.

NEWS LETTER FROM CANARA ENGINEERING COLLEGE

PROGRAMME EDUCATIONAL OBJECTIVES (PEO)

1. Graduates will apply knowledge and skills of computer science and business system to address challenges in various aspects of technology, business and society.
2. Graduates will engage in lifelong learning by adapting to changing industrial and societal needs.
3. Graduates will work efficiently and effectively as computer science and business systems engineers exhibiting team spirit, leadership and ethical qualities.

PROGRAMME OUTCOMES(PO)

- 1.Engineering knowledge:** Apply the knowledge of mathematics, science, engineering fundamentals and an engineering specialization to the solution of complex engineering problems.
- 2.Problem analysis:** Identify, formulate, review research literature and analyze complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences and engineering sciences.
- 3.Design/development of solutions:** Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal and environmental considerations.
- 4.Conduct investigations of complex problems:** Use research-based knowledge and research methods, including design of experiments, analysis and interpretation of data and synthesis of the information to provide valid conclusions.
- 5.Modern tool usage:** Select/Create and apply appropriate techniques, resources and modern engineering and IT tools, including prediction and modelling to complex engineering activities, taking comprehensive cognizance of their limitations.
- 6.The engineer and society:** Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering.
- 7.Environment and Sustainability:** Understand the impact of the professional engineering solutions in societal and environmental contexts and demonstrate the knowledge of and need for sustainable development.
- 8.Ethics:** Apply ethical principles and commit to professional ethics and responsibilities and norms of the relevant scientific and/or engineering practices.
- 9.Individual and team work:** Function effectively as an individual and as a member or leader in diverse teams and in multidisciplinary settings.
- 10.Communication:** Communicate effectively on complex engineering activities with the engineering community and with the society-at-large, such as being able to comprehend and write effective reports and design documentation, make effective presentations and give and receive clear instructions.
- 11.Project management and finance:** Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work as a member and leader in a team to manage projects and in multidisciplinary environments.
- 12. Life-long learning:** Recognize the need for and above have the preparation and ability to engage in independent and life-long learning in the broadcast context of technological changes.

PROGRAMME SPECIFIC OUTCOMES (PSO)

- 1.To engage in entrepreneurial activities and provide solutions to problems of society via IT.
- 2.Apply concepts of business intelligence and data analytics to design and develop business processes and strategies.

NEWS LETTER FROM CANARA ENGINEERING COLLEGE

STAFF ACHIEVEMENTS

WORKSHOP /FDP ATTENDED

Mrs.Pavithra H B has participated in two Weeks FDP on “TOSCA - Automation Testing Tool,Cloud Computing ,DevOps and generative AI -A Practical Based Approach” Organized by department of CSE,ISE ,CSE(AI&ML) and CSE (Data Science) in Association with Visvesvaraya Technological University Belagavi held from 27th Jan 2025 to 8th Feb 2025.

Mrs.Yashaswini K L Attended five Days National Level E-Workshop (Online) Titled” Advanced Applications of AI in Research & Innovation” on 24-03-2025 to 28-03-2025,Organized by Department of Computer Science & Engineering ,Sri Venkateswara College of Engineering & Technology (Autonomous),Andra Pradesh,& A.C.T Academy,Kerala.

Mrs.Yashaswini K L Attended Two Day National Level FDP (Online) Titled”Use of ICT in various Types of Assessment and Evaluation” on 21-02-2025 & 22-02-2025,Organized by Rastriya Arts Commerce and Science College,Nagad,Maharastra & A.C.T Academy,Kerala.

Mrs.Yashaswini K L Attended One Day National Level Faculty e-Workshop on “AI-Enhanced Teaching:Notebook LM,EduAide,and canva Tools” On 27-02-2025,Organized by A.C.T Academy, kerala.

Mr.Yathish K has participated in two Weeks FDP on “TOSCA - Automation Testing Tool,Cloud Computing ,DevOps and generative AI -A Practical Based Approach” Organized by department of CSE,ISE ,CSE(AI&ML) and CSE (Data Science) in Association with Visvesvaraya Technological University Belagavi held from 27th Jan 2025 to 8th Feb 2025.

Mr.Yathish K has Participated in Five Day FDP on”A Practical Approach to Modern Technologies” organized by the Department of CSE in Association with Department of ISE from 10-02-2025 to 14-02-2025 at Canara Engineering College,Benjanapadavu, Bantwal.

Mr.Yathish K Participating in the FDP on "Innovation and Entrepreneurship” held from 24th to 28th March 2025 at Sahyadri College of Engineering & Management, Mangaluru organized by All India Council for Technical Education AICTE and Ministry of Education’s innovation Cell (MIC).

Mr.Yathish K has participated in the National FDP on th "Cybersecurity” 5 held on 30 Jan, 2025 at virtualy and he/she is entitled with 3 CPE Creditpoints issued by National Cyber Security Standards

Mrs Yojana Kiran Kumar has successfully cleared the assessment on “Artificial-Intelligence-Engineer (AIE)” Aligned to Competency Standards developed by IT-ITeS Sector Skills Council NASSCOM in collaboration with Industry and approved by Government on 19-04-2025.

NEWS LETTER FROM CANARA ENGINEERING COLLEGE

NPTEL ONLINE COURSE

Mrs.Yashaswini K L has successfully completed the NPTEL Course on "Introduction to Machine Learning" in April 2025

Mrs.Ashwini K G has successfully completed the NPTEL Course on "Research Methodology in Natural Sciences" in April 2025

Mr.Yathish K has successfully completed the NPTEL Course on "Computer Network and Internet Protocol" in April 2025

PAPER PUBLISHED/ PRESENTED IN JOURNALS/ BOOK CHAPTERS/CONFERENCES

Mrs.Pavithra H.B as Participation for 4th IEEE International Conference on Distributed Computing and Electrical Circuits and Electronics organized by IEEE SB Ballari Institute of Technology and Management Ballari, 25-26 April, 2025.

1. Ramesh E., Divakar D., Jayaprakash K., Prathibha M., and Radha E.G. proudly present their research paper, "Harnessing Machine Learning to Illuminate and Anticipate Determinants of Academic Excellence in Students" a novel exploration of student performance prediction using ML models, published in the IEEE COSMIC 2024 Conference Proceedings and now indexed in Scopus. DOI: 10.1109/COSMIC63293.2024.10871450

2. Kanmani, Divakar D., Keshaveni N., Ramesh E., and Prathibha M. unveil their impactful work titled "Machine Learning in Academic Performance Prediction: Analyzing Attendance and Marks to Forecast Future Results," leveraging regression models to predict semester grades with precision—published in IEEE COSMIC 2024 and indexed in Scopus. DOI: 10.1109/COSMIC63293.2024.10871335

3. Divakar D., Rajalakshmi Samaga B.L., Kanmani, Ramesh E., and Prathibha M. share their cutting-edge contribution, "Safe Fly Prediction Model for Unmanned Aerial Vehicle," an intelligent flight safety forecasting system using meteorological data—featured in IEEE COSMIC 2024 Proceedings and now Scopus-indexed. DOI: 10.1109/COSMIC63293.2024.10871266

PATENT PUBLICATION

1.Dr. Rajgopal K T has published a patent on title " Hierarchical Multi-Agent Neural Framework for Concurrent Perceptual Processing in Distributed AI Systems" under Application No.-2025410553881A, dated June 13,2025.

2.Dr. Rajgopal K T has published a patent on title “Sparse Transformer Network for Ultra-Fast Processing of Long Sequence Data”under Application No.-No.202541055383 A, dated June 13,2025.

3.Dr. Rajgopal K T has published a patent on title “A Self-Supervised Hybrid Framework for Robust Feature Extraction in Noisy, Unstructured Datasets” under Application No.-202541055378A, dated June 13,2025.

NEWS LETTER FROM CANARA ENGINEERING COLLEGE

ONLINE NPTEL COURSE

Charanya K Naik successfully obtained certification on Data Science for Engineers.

DEPARTMENT ACTIVITY

Data Science Series 1

The Department of Computer Science and Business Systems organized Data Science Series 1, an exclusive session for 6th semester CSBS students. Mr. Anantha Krishna Kamath, Assistant Professor, Department of CSD, CEC was the resource person for the event. The first session in a 6-part series, focused on an Introduction to Python. Objectives of series 1 were to Introduce Python Basics – Cover fundamental syntax, data types, and control structures, Enhance Programming Skills – Help students develop problem-solving abilities using Python, Lay the Foundation for Data Science – Prepare students for advanced topics in the upcoming sessions. A Total of 47 students benefited from this first session in a 6-part series event. Mrs. Yojana KiranKumar, Assistant Professor, Department of CSBS coordinated the event.

Fundamentals of Python for Machine Learning

The first session of "Fundamentals of Python for Machine Learning" introduced participants to the core concepts of Python and its role in Machine Learning (ML). The session provided a strong foundation for logical thinking and structured programming, essential for future ML concepts and implementations

Data Science Series 2 :Mathematics for Data Science

The Department of Computer Science and Business Systems organized Data Science Series 2:Mathematics for Data Science , an exclusive session for 6th semester CSBS students. Mr. Anantha Krishna Kamath, Assistant Professor, Department of CSD, CEC was the resource person for the event .The second session in a 6-part series, focused on strengthening mathematical foundations essential for data science. The objectives of Series 2 were to: Build Mathematical Foundations – Introduce key mathematical concepts such as linear algebra, probability, and statistics. Enhance Analytical Skills – Help students develop problem-solving abilities using mathematical techniques. Prepare for Advanced Topics – Equip students with the necessary knowledge for upcoming sessions on data science. A Total of 15 students benefited from this first session in a 6-part series event. Mrs.Yojana KiranKumar, Assistant Professor, Department of CSBS coordinated the event.

Fundamentals of Python for Machine Learning-series2

In the second week of the "Fundamentals of Python for Machine Learning" program, participants explored essential Python data structures such as lists, tuples, sets, and dictionaries, along with their applications in ML workflows. Hands-on exercises focused on writing reusable code and efficiently handling datasets, laying a strong foundation for data preprocessing in machine learning

Fundamentals of Python for Machine Learning-series3

In series 3 of the "Fundamentals of Python for Machine Learning" program, participants explored Python libraries essential for ML applications. An insight of prediction models were also introduced by the resource person

Fundamentals of Python for Machine Learning-series4

In Series 4 of the "Fundamentals of Python for Machine Learning" program, participants applied their learning by developing machine learning prediction models for simple applications such as score prediction, rainfall prediction, and health monitoring. Building upon the concepts explored in the previous session, students gained hands-on experience in implementing predictive models

Data Science Series 3 : Data mining

The Department of Computer Science and Business Systems organized Data Science Series 3:Data Mining , an exclusive session for 6th semester CSBS students. Mr. Anantha Krishna Kamath, Assistant Professor, Department of CSD, CEC was the resource person for the event .As the third session in a 6-part Data Science series, this installment focused on introducing and exploring fundamental data mining techniques and their real-world applications.The objectives of Series 3 were to: Understand Basics of Data Mining – Learn what data mining is and why it is important. Learn Common Techniques – Explore simple techniques like classification, clustering, and finding patterns in data. See Real-Life Examples – Understand how data mining is used in real-world situations like shopping, banking, and social media. A Total of 19 students benefited from this first session in a 6-part series event. The event was successfully coordinated by Mrs. Yojana Kiran Kumar, Assistant Professor, Department of CSBS.

Data Science Series 4: Data Mining II

The Department of Computer Science and Business Systems in association with IIC organized Data Science Series 4: Data Mining II, exclusive sessions for 6th semester CSBS students. Mr. Anantha Krishna Kamath, Assistant Professor, Department of CSD, CEC, served as the resource person.As the 4 part of the six-part Data Science series, this session focused on introducing and deepening the understanding of fundamental data mining techniques and their real-world applications. Objectives of the Sessions: Understand the Basics of Data Mining: Learn what data mining is and why it is important. ,Explore Common Techniques: Study techniques like classification, clustering, and pattern recognition ,Real-World Applications: Discover how data mining is applied in areas such as shopping, banking, and social media.A Total of 23 students benefited from this session . The event was successfully coordinated by Mrs. Yojana Kiran Kumar, Assistant Professor, Department of CSBS.

A webinar on Cyber Security Awareness

The department of Computer Science & Business System in association with R&D cell organized a webinar on "Cyber Security Awareness" by Mr. PavanKumar, Senior Penetration Tester, Hacfy. A Total of 42 students from all over the college participated in the webinar. The Webinar was conducted for students to educate them on the importance of staying safe online. The primary objectives was to raise awareness about common cyber threats such as phishing, malware, and identity theft, and to promote best practices for securing personal and academic data. Interactive discussions and real-life examples helped students understand the risks and preventive measures, equipping them with essential cyber hygiene skills.

Data Science Series 5: Python for Data Science

The Department of Computer Science and Business Systems in association with IIC organized Data Science Series 5: Python for Data Science, exclusive sessions for 6th semester CSBS students. Mr. Anantha Krishna Kamath, Assistant Professor, Department of CSD, CEC, served as the resource person. As the 5 part of the six-part Data Science series, this session focused on enhancing students' understanding of Python programming in the context of data science. Objectives of the Sessions: To equip students with essential Python programming skills tailored for data science applications. To introduce and implement fundamental data mining techniques through hands-on coding exercises. To connect theoretical concepts with real-world applications, fostering critical thinking and problem-solving in data-driven environments. A Total of 24 students benefited from this session. The event was successfully coordinated by Mrs. Yojana Kiran Kumar, Assistant Professor, Department of CSBS.

Data Science series 6 : The final evaluation

The Department of Computer Science and Business Systems, in association with the Institution's Innovation Council (IIC), successfully organized the final session of the Data Science Series 6—a exclusively for the 6th semester CSBS students. The session was conducted by Mr. Anantha Krishna Kamath, Assistant Professor, Department of Computer Science and Design, CEC, who served as the resource person and guided students through the concluding phase of the six-part series. Objectives of the Session: To assess students' understanding of key data science concepts covered throughout the six-part series. To provide an opportunity for applied learning through a final evaluation quiz. To gather constructive feedback for improving future technical training initiatives. As part of the final evaluation, a quiz was conducted, followed by feedback collection from the participants. A Total of 16 students benefited from this session. The event was efficiently coordinated by Mrs. Yojana Kiran Kumar, Assistant Professor, Department of CSBS. The series concluded on a successful note, enriching students with key insights and practical knowledge in data science.

Getting Started with Power BI

The Department of Computer Science and Business System, in association with the Institution's Innovation Council (IIC), organized a hands-on session titled "Getting Started with Power BI" on 16th May 2025. The session was exclusively conducted for 6th semester CSBS students with the objective of enhancing their data analytics skills through Microsoft Power BI, a widely used business intelligence tool. Objectives of the Session: To introduce students to the fundamentals of Microsoft Power BI for effective data visualization and interpretation. To provide hands-on experience in loading, transforming, and analyzing data using Power BI. To promote peer-led learning and foster a data-driven mindset among students for academic and industry applications. The resource persons—Mr. Chirag, Mr. C Thushar, and Mr. Tanish P Shetty—students of the 8th semester CSBS, effectively guided the attendees through various core components of Power BI. The session included demonstrations on data loading, transformation, dashboard creation, and practical visualization techniques. The students were also introduced to real-time data integration and how Power BI supports business decision-making through interactive reports. Overall, 54 students benefitted from the session. Event was coordinated by Mrs. Yojana Kiran Kumar, Asst. Professor, Dept of CSBS.
